

# LOHBERGER®

## Exquisite stoves and cookers

### Patented Jetfire System

**The brand Lohberger is synonymous with innovative design and the embracement of new technologies have lead to products that are unrivalled in their class.**

The patented Jetfire system from Lohberger gives you more output from your wood. Two features make all the difference; firstly, the flames are focussed directly above the combustion chamber; secondly, they are mixed with fresh air to ensure the fuel is burned at temperatures of up to 1,200 degrees, leaving virtually no residue.

#### Benefits

- Cleaner combustion
- Higher efficiency
- Convenient and easy to operate
- Less impact on the environment

#### Minimum environmental load

Purer combustion reduces the strain on the environment, both in terms of reduced consumption of resources, but also in terms of reduced smoke and particles.

The more efficiently a fire burns the fewer CO<sub>2</sub> emissions are produced. Less fuel is used. Less heat is lost.

#### Multi function stoves

Lohberger understand that wood is the most versatile of fuels, and able to offer so much more than simply heating your room. The Cook Me stove features a ceramic cooking top, perfect for those winter casseroles, whilst the Bake Me comes complete with a top oven section.

The Lobo H<sub>2</sub>O features an integrated boiler, giving an output of 6 kW to water and 2.5 kW to room - making it the perfect heating appliance for modern, well insulated homes.

#### Advanced technology

The Lohberger range of cookers provide the most advance wood and pellet burning technologies with stylish designs suitable for any home.

The cookers can either be freestanding or built-in, with options including integrated boilers, ceramic cooking tops, and even smart phone control.

The Varioline pellet module provides a fully automated solution, switching on and off automatically according to the current heating demands of the property.

#### Lohberger guarantee

The Lohberger range of stoves and cookers come with a manufacturers three year guarantee. See [www.euroheat.co.uk](http://www.euroheat.co.uk) for details and exclusions.

## Bespoke cookers handcrafted for you

With a Lohberger cooker your options to create the perfect wood burning cooker for your home are endless. Each model is made bespoke for your requirements, enabling you to choose the exact model and detail that suits your home.

When ordering your cooker, you will be required to complete a design form to stipulate the exact model and options you require. This will then be used by the Lohberger engineers to handcraft your exact model. Due to this, Lohberger cookers typically take six to eight weeks for delivery.

The Lohberger Varioline model offers a number of specific design features including

Two oven width options of either

- 320 mm (B1) or 370 mm (B2)
- Oven positioned on either the left or right hand side
- Optional housing for a gas or electric oven
- Freestanding or integrated plinth options
- Choice of colours
- Choice of flue position
- Heat spacers

# Lohberger Cook Me & Bake Me

Wood burning cooking stoves

Lohberger Cook Me

Cook Me ceramic cooking plate

Description	Colour	Order Code
 Cook Me with ceramic hotplate	Black	LH007
 Bake Me with oven	Black	LH008

## Options

 External air kit	LH009
Adaptor to 150 mm flue	FP3054
